

WizzLuck

PRESS RELEASE

The first augmented reality dating app specially designed for the gay community
Shake, Laugh & Love

WizzLuck is an augmented reality gay dating app that send random and funny pickup lines to connect with people nearby.

WizzLuck is an app conducted for very close proximities, specially designed for the gay community and perfectly adapted to urban spaces.

The Wizz is "augmented reality interface" that gives the ability to precisely locate users within 500 meters . Users can find on their 'Wizz' those they have seen in real life interaction before engaging a conversation.

The DailyLuck shows on a timeline people you have crossed paths with within the last 24H. The Nearby shows further users located above 500meters.

The Shake is an innovative feature in the chat that allows users to break the ice by sending random and funny pick-up lines and then help communicate with humor and originality.

The Profile is your personal page in which you can add, edit your personal information and pictures but also look at who has recently viewed your profile during the day.

WizzLuck is 100% free to download and based on an InApp purchases model.

In the near future WizzLuck has plans to add an innovative feature which will dramatically increase its users experience and retention on the app.

Stay Tuned !!!!
